# MRI vs. fMRI

MRI

one image

high resolution  
(1 mm or less)

fMRI

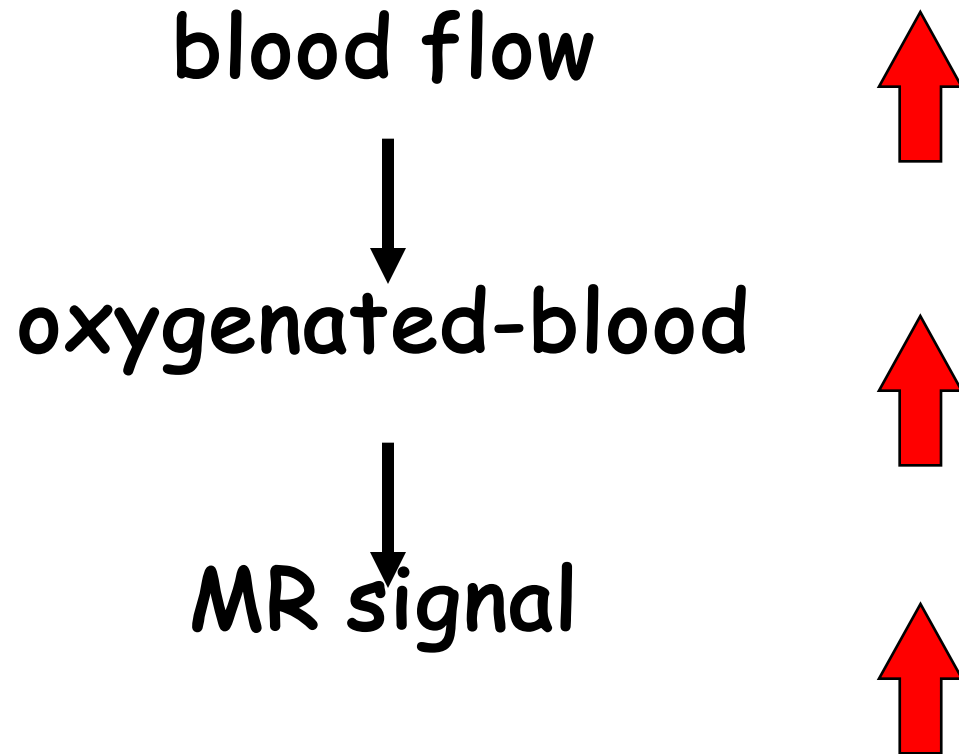

many images  
(e.g., every 2 sec for 5 mins)

low resolution  
(1.5 to 4 mm)

# BOLD (Blood Oxygen Level Dependent) Contrast

# Basis of BOLD Contrast

*Oxygenated and deoxygenated red blood cells have different magnetic properties*

red blood cells

oxygenated

deoxygenated

# Principle Investigators doing fMRI:

## **NIMH:**

Peter Bandettini, Ph.D.  
Karen Berman, M.D.  
James Blair, Ph.D.  
Robert Cohen, M.D., Ph.D.  
Christian Grillon, Ph.D.  
Wayne Drevets, M.D.  
Ellen Liebenluft, M.D.  
Daniel Pine, M.D.  
Jun Shen, Ph.D.  
Leslie Ungerleider, Ph.D.  
Daniel Weinberger, M.D.

## **NINDS:**

Leonardo Cohen, M.D.  
Jeff Duyn, Ph.D.  
Jordan Graffman, Ph.D.  
Mark Hallet, Ph.D.  
Alan Koretsky, Ph.D.  
Chrsty Ludlow, Ph.D.

## **NIAAA:**

Daniel Hommer, M.D.

## **NICHD:**

Peter Basser, Ph.D.  
Allen Braun, M.D.

**Amygdala Response: 2 Group > 1 Group**

# Uses

## Understanding normal brain organization and changes

- networks involved with specific tasks (low to high level processing)
- changes over time (seconds to years)
- correlates of behavior (response accuracy, performance changes...)

## Clinical research

- correlates of specifically activated networks to clinical populations
- presurgical mapping

# Future Uses

## Complementary use for clinical diagnosis

- utilization of clinical research results
- prediction of pathology

## Clinical treatment and assessment

- drug, therapy, rehabilitation, biofeedback
- epileptic foci mapping
- drug effects

## Non clinical uses

- complementary use with behavioral, anatomical, other modality results
- lie detection
- prediction of behavior tendencies
- brain/computer interface

## ***Stimulus presentation equipment***

- Back projection screen 48X36in (DaLite Polacoat 100) mounted on an aluminum stand.
- Sharp LCD projectors with Buhl lens
- Avotec Silent Vision fiber-optic glasses for visual stimulus with integrated eye-tracking system
- SMI iView system with long-range lens for video-camera based eye-tracking
- Avotec Silent Scan earphones
- Phone-Or Dual Channel Noise-canceling Microphone

## ***Software and response devices***

- Presentation software
- e-prime (biological)
- Psychophysics Toolbox
- SuperLab
- Custom designed button response units and physiological interfaces RSB

## ***New Devices (acquired in the last year)***

- EEG
- Custom DLP projection (higher temporal resolution)
- DLP Backprojection
- Fiber-optic response systems
- MRI compatible power-injector
- Drug infusion pump

# Pulse Sequences

## BOLD imaging:

- **EPI-RT** : General purpose BOLD imaging with real time display
- **epi3, epi4** : NIH EPI sequences, epi4 for use with 16 channel system
- **SPEP**: Simultaneous perfusion and BOLD -spiral/EPI sequence with perfusion and diffusion modules and multi-echo and combined SE and GE capability
- **Clustered volume EPI-RT**: (for auditory studies)
- **NIH-EPI** (for use with 16 channel receiver system)

## Anatomical Imaging:

- **MP-RAGE**: T1 weighted sequence with excellent Gray/White matter contrast
- standard product multi-shot sequences like: SPGR, SE, FSE etc.

FIM Opt

The figure displays a 3x3 grid of time-series plots. The top plot shows a signal with a peak at 1609. The middle plot shows a signal with a peak at 1451. The bottom plot shows a signal with a peak at 1451. A yellow box highlights a region of interest in the middle plot. The bottom right corner shows the coordinates and parameters for the selected voxel.

Website:

FMRI.NIMH.NIH.GOV

The screenshot shows the homepage of the FMRI Facility at NIH. At the top left is the FMRI logo with the URL [fmrif.nih.nih.gov](http://fmrif.nih.nih.gov). A search bar is located at the top right. Below the logo is a navigation menu with links for welcome, news, search, and sitemap. A secondary menu includes links for pab, my folder, my preferences, edit users, log out, mailing list banner, undo, phone setup, and php/pg. A breadcrumb trail indicates 'you are here: home'.

The main content area features a 'Welcome to the fMRI Facility at NIH' heading. Below this are two columns of brain scan images. The left column is labeled 'GE: I<sub>s</sub>=100μA, I<sub>e</sub>=150μA' and the right column is labeled 'SE: I<sub>s</sub>=100μA, I<sub>e</sub>=150μA'. The images include axial and coronal slices of the brain, some with color-coded activation areas, and a central 3D brain model with colored regions. A T-value scale from 0 to 4 is visible at the bottom of the images. A caption below the images reads: 'Click on images to view recent research using the fMRI.'.

On the left side, there is a 'site navigation' section with two sub-sections: 'public resources' and 'internal resources'. The 'public resources' section includes links for About, Research, Investigators, Staff, Education, Volunteer, and Directions. The 'internal resources' section includes links for Help!, scanner docs, tools/software, scanner room, forums, mailing lists, faqs, and scheduling.

On the right side, there is a 'news' section with two items: 'fMRI Poster at NIMH Retreat 09/22/2003' and 'Severe Weather Info 09/17/2003'.

At the bottom of the page, there are logos for NIH (National Institute of Mental Health), NIAAA, and the National Institutes of Health.

# Education / Support:

- Weekly fMRI discussions (Fridays, 1pm, 10/4N230)
- Bi-Monthly user meetings (First Monday every other month, 3pm, 10/4N230)
- Bi-Monthly steering committee meetings (First Monday every other month, 3pm, 10/4N230)
- Meetings with each PI to address needs and concerns & guide purchases
- Training in scanner operation and use of subject interface devices
- Consulting on paradigm design

# PI Research:

## **NIMH:**

Peter Bandettini, Ph.D.  
Karen Berman, M.D.  
James Blair, Ph.D.  
Robert Cohen, M.D., Ph.D.  
Christian Grillon, Ph.D.  
Wayne Drevets, M.D.  
Ellen Liebenluft, M.D.  
Daniel Pine, M.D.  
Jun Shen, Ph.D.  
Leslie Ungerleider, Ph.D.  
Daniel Weinberger, M.D.

## **NINDS:**

Leonardo Cohen, M.D.  
Jeff Duyn, Ph.D.  
Jordan Graffman, Ph.D.  
Mark Hallet, Ph.D.  
Alan Koretsky, Ph.D.  
Chrsity Ludlow, Ph.D.

## **NIAAA:**

Daniel Hommer, M.D.

## **NICHD:**

Peter Basser, Ph.D.  
Allen Braun, M.D.

20

**2003:**

**Up days:**

**3T-1: 303**

**3T-2: 280**

**Total budget (including salaries):**

**\$1,746 000.00**

**Cost per usage hour (only counting**

**up days x 10 hrs day): \$309**

**Cost per Gigabyte: \$2.35**

# **Functional MRI**

## **Papers Published at the NIH:**

**2000: 20**

**2001: 11**

**2002: 24**

**2003: 26**

**2004: 31**

**2005: 5**

# Ongoing Projects and Directions

- **More routine access to advanced subject interface devices (eye tracking, skin conductance).**
- **Better dissemination of methods information to and across groups.**
- **Simultaneous EEG/fMRI.**
- **Higher resolution single shot fMRI (1.5 mm<sup>3</sup>).**
- **More routine access to perfusion imaging methods and processing.**
- **Better shimming techniques (to image base of brain more effectively).**
